Presence In India

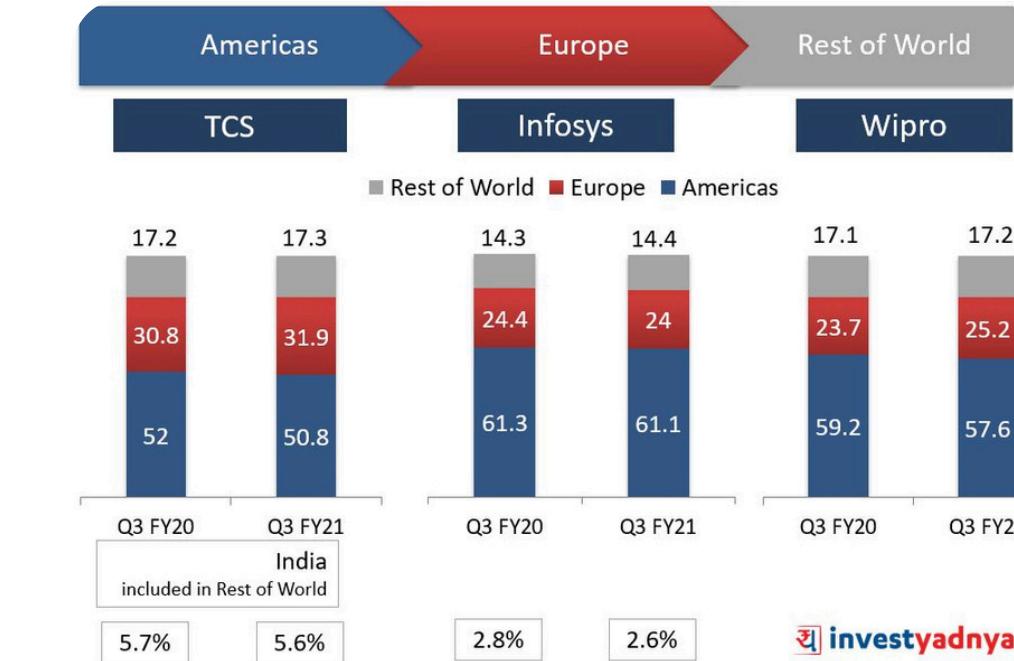

Revenue Analysis

Competitors

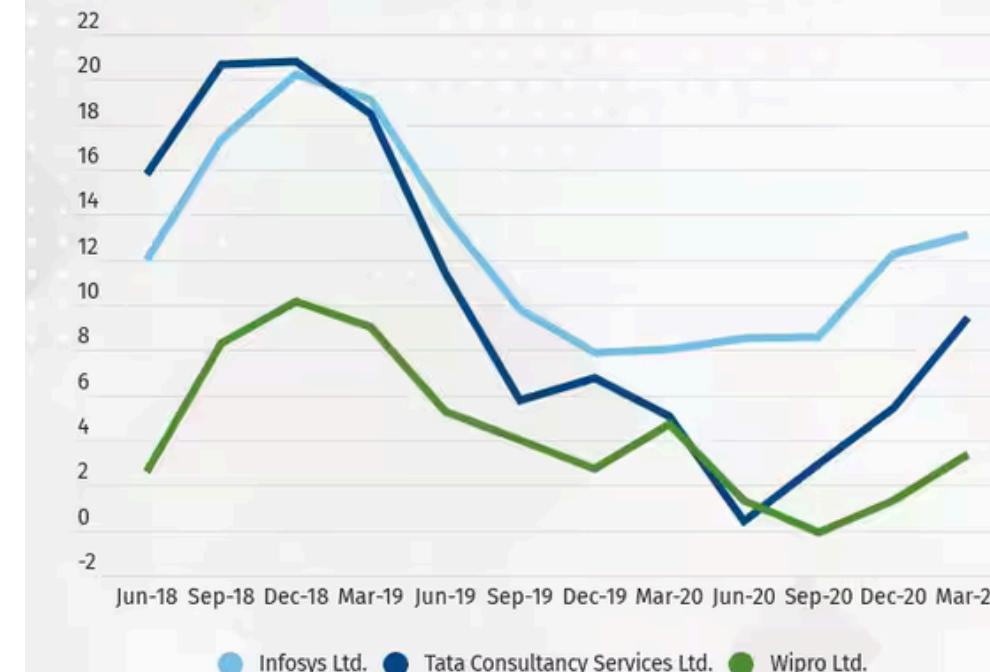

Net Sales (Rs Cr)

		Market Cap
IN	Infosys	91.2B INR
IE	Accenture PLC	205B USD
IN	tcs	16T INR
US	IBM	178.5B USD
IN	HCLTech	4.5T INR
IN	wipro	2.7T INR

- Year on year, Infosys revenue growth outpaced TCS and Wipro.
- On a quarterly basis, TCS continues to maintain a higher revenue growth compared to Infosys and Wipro.
- The operating profit margin gap between Infosys and TCS narrowed in previous years.
- Percentage revenue of Infosys from India is less than the percentage revenues of TCS and Wipro from India.
- In Apr 2023, stock prices of Infosys and Nift 50 Index were same but suddenly a dip can be seen for Infosys and then the trend follows till now.

Partners for AI

some potential benefits of mergers and acquisitions (M&A) for Infosys

- Enhanced Financial Services
- Stronger European Presence
- Advanced Semiconductor Tech
- Innovation in Banking Tech
- Integrated Solutions Offering
- Expanded Delivery Network
- Revenue Diversification

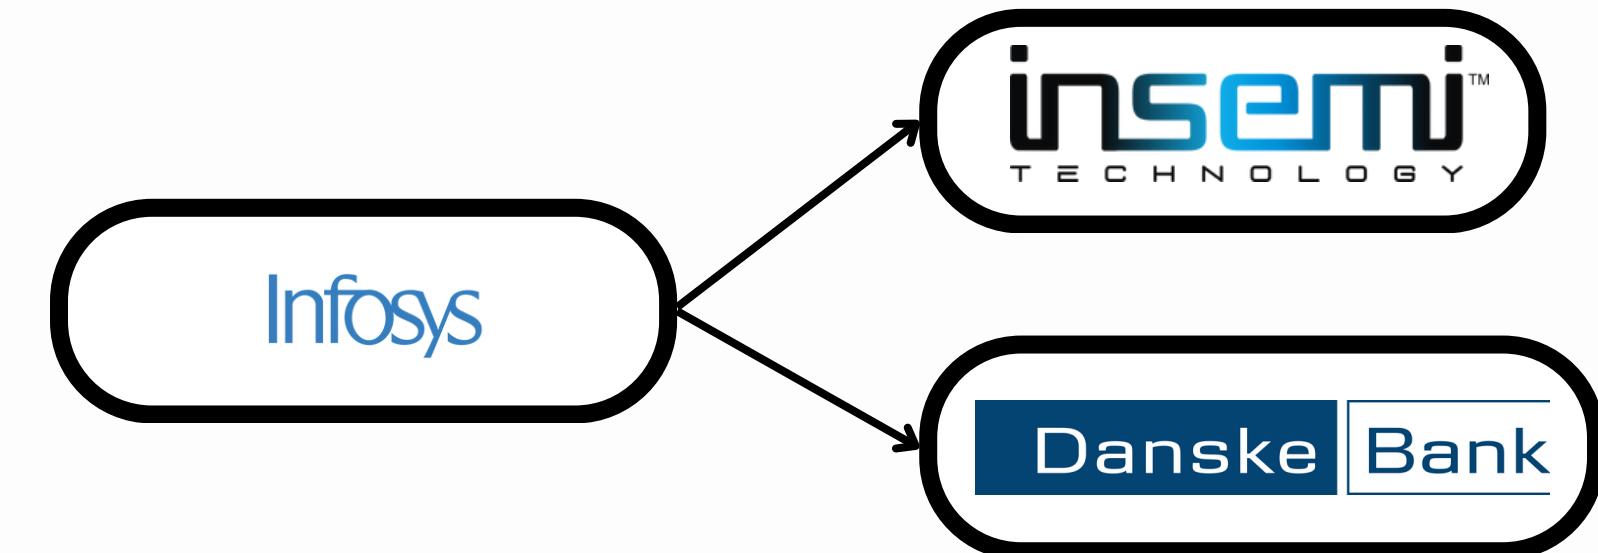

Mergers and acquisitions (M&A)

Infosys has a system M&A approach aimed to strengthen its capabilities, deepen industry expertise, and expand geographical footprint.

During the year ended March 31, 2024, the Group entered into definitive agreements to acquire:

1. Danske IT and Support Services India Private Limited (Danske IT). The acquisition of Danske IT was completed as on September 1, 2023. Eventually, the name of Danske IT was changed to Idunn Information Technology Private Limited effective April 1, 2024.

2. In Semi Technology Services Private Limited, a semiconductor design services company headquartered in India (subject to customary closing adjustments).

SWOT Analysis

STRENGTHS

Infosys boasts a strong global presence and reputation for quality services. Its focus on innovation, diverse talent pool, and robust client partnerships set it apart in the IT industry.

WEAKNESSES

Infosys faces challenges with attrition rates and dependency on outsourcing. It also struggles with regulatory compliance and adapting to rapid technological changes.

THREATS

Intense competition from global rivals, cybersecurity risks, and geopolitical uncertainties pose threats. Talent retention and regulatory changes may impact operations. Economic downturns can affect client spending on IT services.

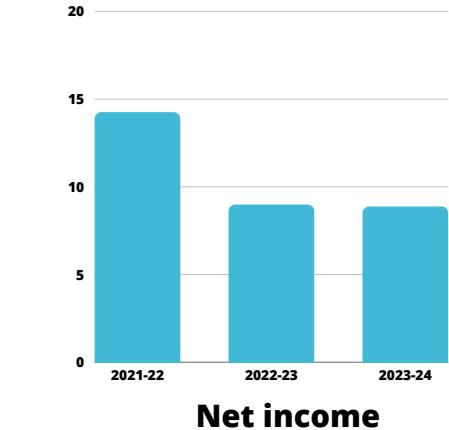

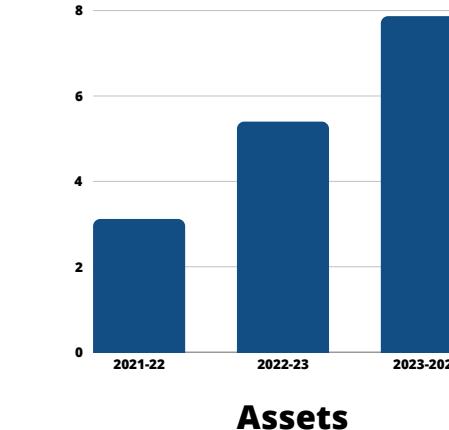

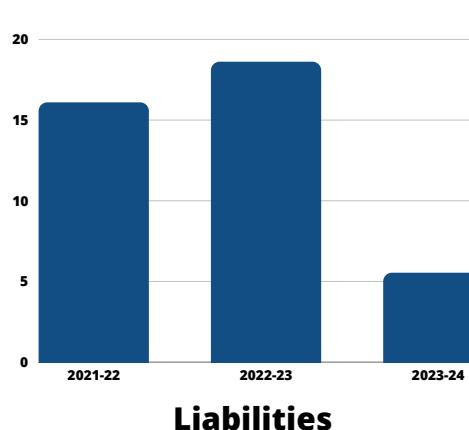

OPPORTUNITIES

Expansion into emerging markets, leveraging digital transformation, and strategic acquisitions offer growth potential. Investing in AI and automation can enhance efficiency and competitiveness.

Investment Decision

- PB Ratio of Infosys is somewhat on higher side, which shows that company is overvalued, as Wipro and HCL Technologies being in the same industry have lower PB, Although not the same case for TCS.**
- Infosys' P/E of 29.5 is within the range of its peers but leans slightly toward the higher side compared to the industry average (considering peers at 24.6 and 28.9).**
- A higher P/E ratio, like 35.5, often suggests that the market expects higher growth from that company compared to one with a lower P/E ratio. Infosys' P/E being in the middle could indicate moderate growth expectations relative to its peers**
- Infosys has maintained a relatively stable FCF over the three years, with a slight dip in 2023. This suggests that the company is consistently generating cash after accounting for capital expenditures, which is a positive indicator of financial health.**
- Revenue of Infosys is upward trending but Revenue growth percentage is showing a decreasing trend.**
- Liabilities growth has decreased recently but assets growth has increased, which are collectively good indications.**
- Promoter's share in Infosys is about 13.1% which is very low compared to its peers.**

Stock	PE Ratio	PB Ratio
Infosys Ltd	29.44	8.73
Tata Consultancy Services Ltd	35.39	17.79
HCL Technologies Ltd	28.93	6.65
Wipro Ltd	24.59	3.64

Conclusion

Investing in Infosys presents a mixed outlook. While the company shows strong fundamentals with no long-term debt, a reasonable P/E ratio, and robust cash flow, the cautious revenue guidance and competitive pressures warrant a careful approach. Investors might consider waiting for clearer signals of recovery in the IT sector or more favorable market conditions before making a significant investment. If an investor wants to invest in IT sector and want a low risk and lower return investment, then he/she can consider investing in Infosys.

THANK YOU!
